SUPREME *Hands-On* **Precision in Morphology & Color Optics of Composites**

By Liu Jingjin.

It is a true pleasure to invite you to participate in Supreme Hands-On, a program designed to transform your approach to aesthetic dentistry. My goal with this course is not only to teach you how to restore teeth, but to truly understand the intimate nature of light and form.

Often, anterior restoration is perceived as a complex challenge filled with uncertainty. Over these two days, I will present my concept of dental construction: a simplified, logical method to capture and transfer color predictably.

We will analyze why dental tissues behave a certain way under light and how we can use composites to replicate advanced optical effects, such as translucency and the halo effect. Under the microscope, we will see how every structural detail counts toward the final success.

I will guide you step-by-step through intensive practical sessions where we will model, layer, and bring natural morphology to life. You will learn my personal microtexture and polishing protocols so that your restorations not only look real, but feel natural.

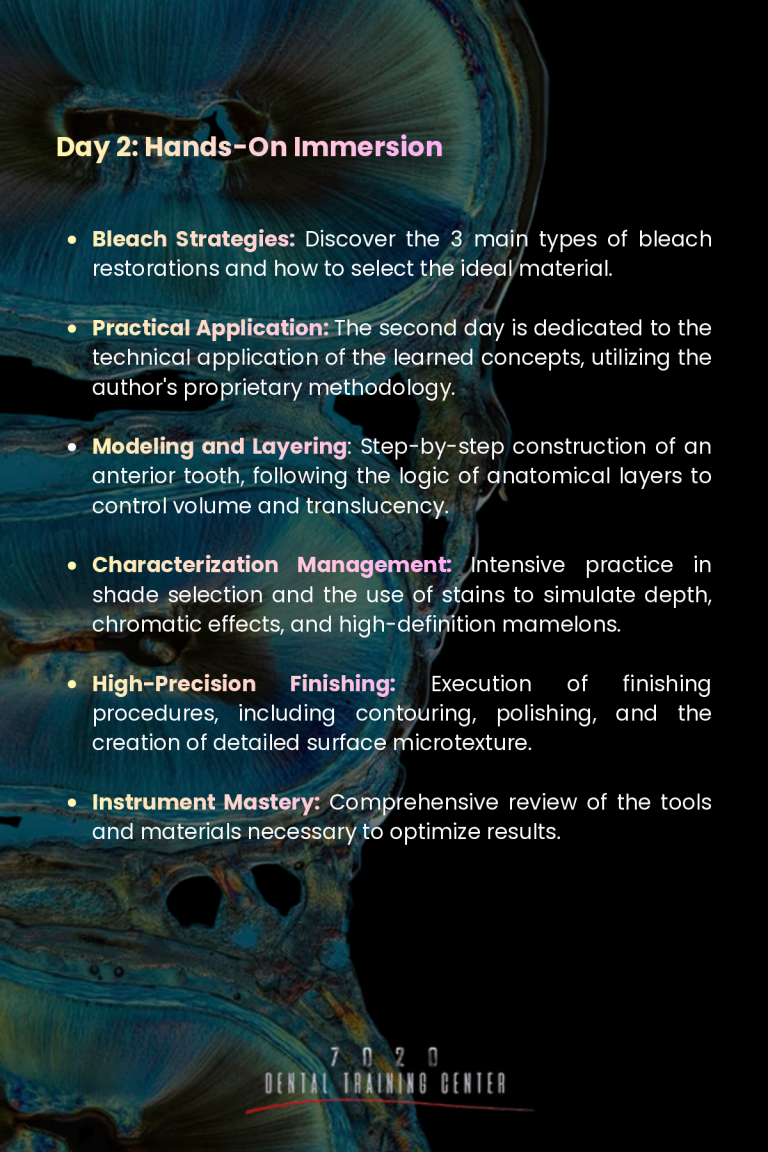

-Liu Jingjin

¿QUÉ APRENDERÁS EN ESTE CURSO?

Day 1: Advanced Theory and Clinical Demonstration

The first day focuses on mastering the science of light and anatomy to simplify color creation in the anterior region.

- **Optical Fundamentals:** Analysis of dental tissue optics and how composite materials interact with light. We will study the anatomy of translucency and internal structures (mamelons) from a photochemical perspective.
- **Color Protocol:** Chromatic design of restorations and logical layering techniques to reproduce natural effects, such as the incisal "halo" effect.
- **Morphology and Texturing:** Detailed protocols for finishing, polishing, and creating microtexture (perikymata) to achieve a surface that mimics natural dentition.
- **Live Demonstration:** A hands-on live session under the microscope where the speaker will demonstrate the clinical application of these concepts, concluding with a Q&A session and an analysis of complex cases.

Day 2: Hands-On Immersion

- **Bleach Strategies:** Discover the 3 main types of bleach restorations and how to select the ideal material.
- **Practical Application:** The second day is dedicated to the technical application of the learned concepts, utilizing the author's proprietary methodology.
- **Modeling and Layering:** Step-by-step construction of an anterior tooth, following the logic of anatomical layers to control volume and translucency.
- **Characterization Management:** Intensive practice in shade selection and the use of stains to simulate depth, chromatic effects, and high-definition mamelons.
- **High-Precision Finishing:** Execution of finishing procedures, including contouring, polishing, and the creation of detailed surface microtexture.
- **Instrument Mastery:** Comprehensive review of the tools and materials necessary to optimize results.

FULL ACCESS INFORMATION

Your Full Access registration includes full admission to the Dental Fusion 2027 Congress, followed by a specialized two-day Hands-on course where you will master stratification techniques.

Date: TUESDAY 13th - WEDNESDAY 14TH , APRIL 2027.

Time: 9:00 AM – 6:00 PM

Location: Museo del Vino y la Vid, Valle de Guadalupe, Baja California, Mexico.

INVESTMENT Total Cost: \$45,000 MXN

Your registration includes:

- **Total Access:** Admission to both the Dental Fusion 2027 Congress and the specialized Hands-on course.
- **Catering:** Continuous coffee break service and lunch included throughout the event.
- **Materials:** All specific materials for the practical sessions are fully included. A list of any minimal additional requirements will be sent to participants a few months before the program begins; please note that most tools and supplies are provided on-site.

PAYMENT PLANS: Interested in paying in installments?

We offer flexible payment options for your convenience. To set up a deferred payment plan for the Hands-on course, please visit our main website and click the WhatsApp button. One of our assistants will personally guide you through the process to coordinate your installments.
